595 - NORTHCOTE ROAD

Project Completion

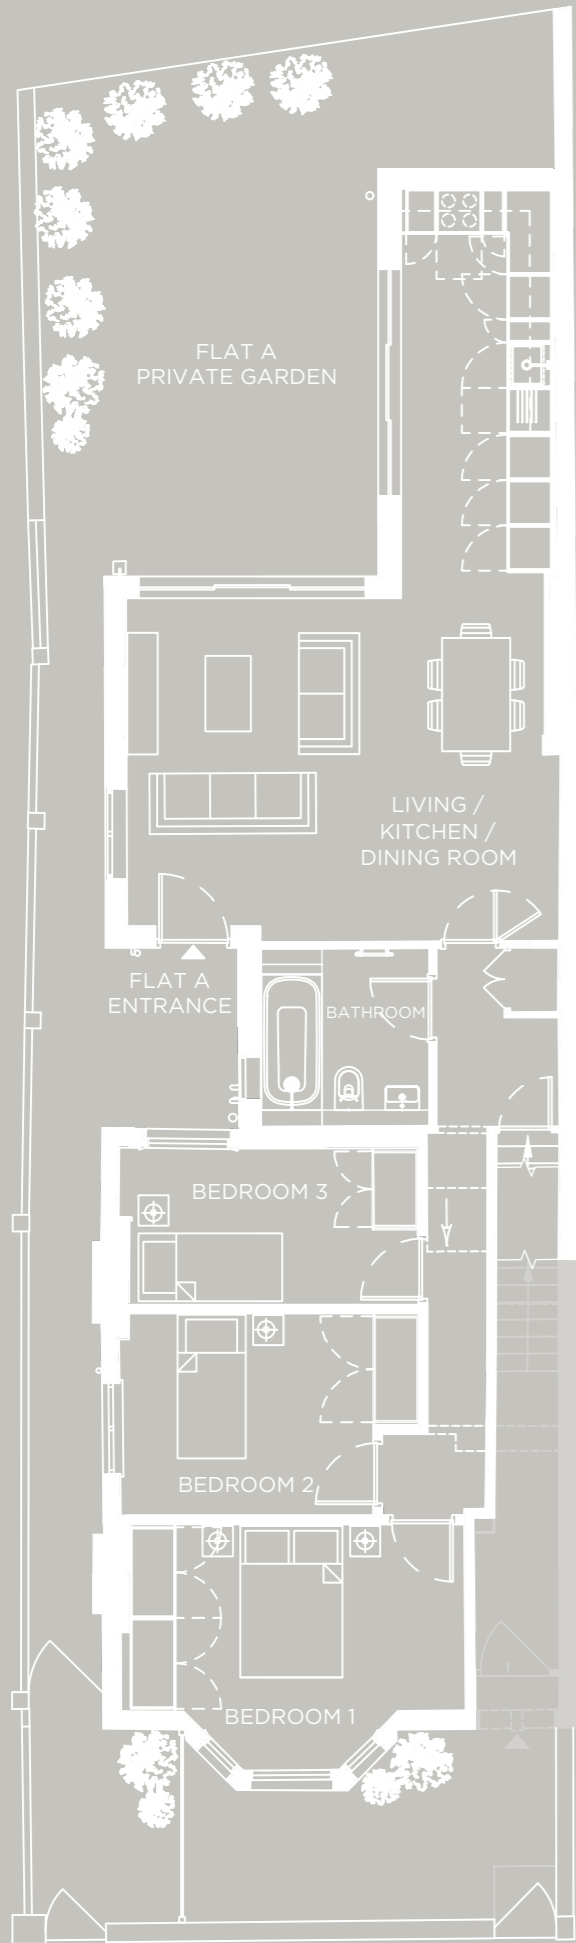

NORTHCOTE ROAD

The brief for this project was to divide a single property into two separate units. We undertook the project from concept to completion and have delivered with one unit occupied very shortly after. We managed to increase the floorspace by reconstructing the roof and extending the closet wing. We also managed to secure an additional balcony to the upper unit through planning, providing the units with a good amount of amenity space.
